

BOLTE

Indigenous Technology for Nigeria — and ultimately Africa.
First Onboarding • Virtual • 60 minutes • Co-chaired

Identity — Vision / Mission / Aim

VISION: a technologically independent Nigeria, ultimately Africa.

MISSION: research, engineer, develop, deploy indigenous tech — defense & security first.

AIM: self-reliance through research, engineering, invention — foundation for Africa.

Bigger cycle: Nigeria → African Capability → African Technological Independence.

7 Goals at a glance

G1 Defense & security technology (primary focus).

G2 Backbone • G3 Ideas→inventions • G4 Talent community.

G5 Strategic sectors • G6 Research ecosystem • G7 Build FOR Nigeria.

Rule: if tech solves an important Nigerian problem, explore it.

The BOLTE Model

PROBLEM → IDEA → RESEARCH → ENGINEERING → PROTOTYPE →
TESTING → IMPROVEMENT → DEPLOYMENT → IMPACT.

Ecosystem bridge: Idea → Research → Prototype → Testing → Product → Deployment.

“All problems are solved when you put things together.”

How we work

2 founders + 5 seats: Treasurer, Product/Ops, 3 builders (assignments async).

Cadence: weekly build review + monthly strategy. Everything documented.

Conduct: original work, no leaks, declare conflicts, safety first.

Money (detail next session): 50% treasury / 20% founders / 30% members.

Flagship: AeroPulse-NG

PROTOTYPE • TRL 4-5

Air-gapped offline-first surveillance: ~\$150 SDR + PC → ATC/tactical workstation.

ADS-B/Mode S + ACARS → EKF tracking → STCA conflicts → weather fusion → defence overlays.

Single decode path (sim == live). Deterministic, replayable, locally maintainable.

Immediate focus: NDAIE 2026

National Innovation Pitch — Flight Planning & Air Traffic Management.

Due 26 Sept 23:59 WAT: form + 300-word summary + 10-slide PDF.

Only 2–5 registered students (16–30, enrolled) may present.

Internal freeze 19 Sept • submit 25 Sept • video 14 Oct • semi 28 Oct • finals 27 Nov
Lagos.

What happens next

Homework (48h): questionnaire minimum — date, seat preference, eligibility, deck comments.

Next session: lock sub-team + slide owners + travel plan.

Nothing to sign today. MOU/NDA/IP + equity finalized async after Session 2.

Access: confirm comms channel + file sharing before close.

Close — put things together

“All problems are solved when you put things together.”

Q&A (remaining minutes).

Action log readout: Decision | Owner | Date — verbal consent to close.

Thank you — build for Nigeria.
