
BOLTE Brand Guide

Brand Guide (v0.2 — Logo Approved 2026-09-06)

Logo system (final)

- **Mark:** bolt piercing a hexagonal “C” — navy #0A1428 on light, white #FFFFFF on dark.
- **Lockup:** BŁTE wordmark where O = bolt-hex mark, E = sigma-style cut. Two versions:
 - Dark-bg: white wordmark on deep navy #0A1428 .
 - Light-bg: navy wordmark on white; bolt-hex may render in steel grey #5B6B7F .
- **Watermark:** oversized low-opacity lockup behind content (decks, covers) — never behind body text.
- **Files:** assets/logo-placeholder/bolte-*.png (see README.md there for exact names).

Wordmark fallback (use only if logo files missing)

- **Text:** BOLTE — all caps, bold, letter-spacing 0.08em. Never Bolte / bolte in headings.
- **Placeholder lockup:** BOLTE + subtitle CORPORATE DIRECTION or Indigenous Technology for Nigeria & Africa .
- **Clearspace:** height of “B” on all sides. Min width: 120px digital / 30mm print.

Colors (final)

- **Primary navy:** #0A1428 (backgrounds, light-bg wordmark)
- **Accent blue:** #2E86DE (links, rules, highlights)
- **Steel grey:** #5B6B7F (bolt-hex on light lockup, muted graphics)
- **Text on dark:** #FFFFFF / muted #B8C2CC
- **Text on light:** #0A1428 / muted #3D4A5C

- Danger/alert: #E63946 (demos only)

Typography (interim system stack)

- Headings: bold sans (Inter / system-ui) until brand font chosen.
- Body: system-ui, 16–18px, line-height 1.6. Deck body ≥ 24 pt.
- Mono for specs: ui-monospace.

Usage rules

- Dark-bg lockup on navy/black only; light-bg lockup on white/light only — never cross.
- Watermark opacity $\leq 12\%$; never behind body text or tables.
- No stretching, gradients, recoloring, or drop shadows on logo; clearspace = height of “B”.
- Min sizes: lockup 120px digital / 30mm print; mark alone 32px / 10mm.
- Photography/diagrams over stock clichés; one idea per slide.
- Logo-coming-soon box in `assets/logo-placeholder/` — swap in final SVG + update this file + CHANGELOG.
