

pipeline

Product Pipeline (Post-NDAIE)

Prioritized against Goals 1/5/7 (defense-first, Nigerian-fit, buildable with 7-person team).

| Rank | Concept                                            | Problem                     | Why BOLTE                                | Depends on            |
|------|----------------------------------------------------|-----------------------------|------------------------------------------|-----------------------|
| 2    | Secure field comms kit (offline mesh + encryption) | Tactical comms fragility    | Reuses AeroPulse offline + systems skill | Phase 1 infra         |
| 3    | Low-cost robotics/UGV scout                        | Logistics/surveillance gaps | EKF + autonomy reuse                     | Field trial learnings |
| 4    | Micro-weather station network                      | Harmattan/low-alt data      | AWOS sidecar reuse                       | AeroPulse deployment  |
| 5+   | Agriculture / Energy / Health adaptations          | Per Goal 5                  | Only after core traction                 | Phase 2+              |

Gate: no new build until AeroPulse-NG trial report + treasury review.
